Thursday 9th July
1:30-3:00pm
& **5:00-6:00pm**

Banjos and Double Basses Information Leaflet Term 6

PE - For PE lessons this term, we will be focusing on developing our skills in the sports Rounders and Tennis.

FRENCH - In French this term, we will be exploring our French café topic! We will be recognising items from a French menu; singing songs in French; appreciating similarities and differences between cultures; learning ice-cream flavours and using the language needed when ordering food. We will then be applying this during our school's Diversity Day.

MUSIC - Our music focus will be on the music and songs from our Year 6 Production. The children will be learning a range of songs and developing skills to perform the songs to an audience.

ART - Our Art focus this term is creating props and scenery, which will be used in our end of Year 6 production.

PSHE - We will be looking at many different topics in PSHE this term. We are going to start the term with a couple of lessons on transitioning and preparation for secondary school before moving on to exploring the topics of Banks, Pensions and Consent.

SCIENCE - Our topic is Light and voltage of cells used in the circuit. In our Light topic, we will explore the concept of light travelling in straight lines and how that enables us to see.

STEM - Year 6 will be engaging in a few STEM projects this term, the first of which is to use recyclable materials to create an item of clothing. Please can you save your recyclable materials and get your child to bring these in Monday 15th June for this incredibly exciting project.

MATHS - We will continue to revise and apply our mathematical knowledge through a range of games and activities.

ENGLISH - This term, we will be focusing on our oracy during our rehearsals and performance of our end of year production. Furthermore, the children will also get the opportunity to develop their poetry skills through the creation of their own rap songs based on concepts and ideas that are important to them.
