

Tubas & Trombones

Year 2 Assessments

Year 2 will be completing assessment during term 5, this is similar to the previous SATS testing. Your child will carry out the assessment in small groups with a familiar adult and is non pressurised. Please speak to the class teacher if you have any questions.

Cakes and curriculum.

You are invited in on Monday 20th May from 3pm till 3.30 pm. This will be an opportunity for you to develop further understanding around the Literacy curriculum within year 2.

Class Assemblies

This term both year 2 classes will be sharing their learning with you during our class assemblies.

Trombones

Thursday 2nd May

Tubas

Thursday 9th May.

The assemblies will start at 9.15am in the school hall.

Named items

Please could we ask for children to bring in a named water bottle and for all jumpers to be labelled to ensure they can't be lost.

Hello!

Welcome to our newsletter for **Term 5.**

We are looking forward to an exciting term 5! If you have any queries please feel free to speak to us on the door or contact us on Class charts.

Topic

Our topic for this term is Eco Warriors. We will be doing lots of geography and science work this term on exploring how we can help look after the planet and animals. We are looking forward to a trip to **Asda Park on Friday 17th May.** Where we will carry out a litter pick followed by a play.

English

The children will be continuing with Literacy or RWI lessons this term. Our book for this term is *The Last Wolf* by Mini Grey, the book takes a twist on the fairy tale *Little Red Riding Hood*. The story also links to our geography work on the impact of climate change and deforestation which will promote discussion. We will be exploring the book and completing a range of activities and writing around this.

Numeracy

This term we are going to continue our learning about fractions and finding fractions of amounts. We will be carrying out lots of practical tasks to support us with our learning with money and mass and capacity. We will also be learning about data handling, this includes tally charts, bar graphs and pie charts and we will use the computers to help us do this.

Geography

In Geography we will be exploring Antarctica and Brazil. Looking at where these places are, what animals live there and what life is like. We will then be comparing this to the UK to explore the similarities and differences between these countries.

Science

This term in science we will be linking our learning to Geography and we will be carrying out some experiments to observe and predict what we think we will happen and have discussions around the experiments, these will link to climate change, recycling, endangered animals and rainforests. One of these experiments will link to our learning on Antarctica and explore melting and freezing.
